

We are happy to invite you to:

edaBarCamp

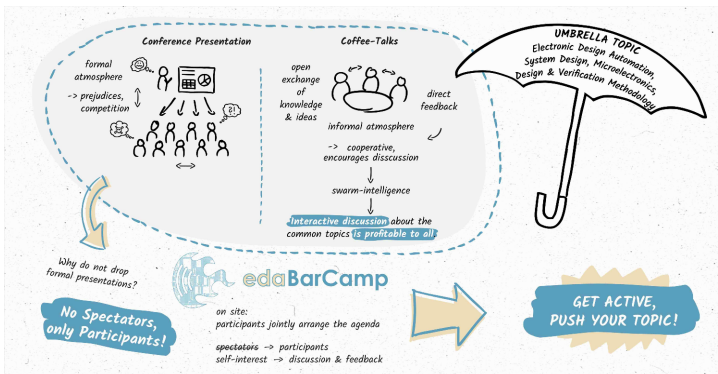

may the 4th be with you

26./27. Februar 2019

X-FAB Semiconductor Foundries GmbH
Erfurt, Germany

You are engaged in Microelectronics, Analog/Mixed-Signal and Electronic Design Automation (EDA) and looking for inspiration in your profession? If you are open for a new event format, offering an exchange of new ideas with colleagues then you should join the next edaBarCamp in Erfurt!

The edaBarCamp offers an open space and is detached from a formal event structure. As a participant you do not only take part. You build the program and you propose, lead and contribute to sessions. There we will interactively propose, exchange and jointly develop approaches, innovations and solutions. By meeting and discussing on a par with each other, your individual work and interests will benefit from the open expert community.
